Notice from the Secretariat

The Linguistic Society of Japan (LSJ) has established the "Code of Ethics of the Linguistic Society of Japan" (hereinafter referred to as the "Code of Ethics") as a set of basic ethical principles and philosophies to be relied upon in research and education in linguistics as well as in the operation of the society, starting in the 2019 academic year. One of the reasons for the establishment of the Code of Ethics is the harassment incident that occurred at the Summer Lecture 2018 held in August 2018. As a society, we are determined not to allow such an incident to happen again, so we drafted a code of ethics in the subcommittee for its establishment, and after discussions in the standing committee and the board of trustees, we enacted it. The Code of Ethics relates to all activities of the society, including research conferences. Regardless of whether you are a member of the Linguistic Society of Japan or not, we would like to ask you to participate in the conference with the understanding that compliance with the Code of Ethics is a condition for participation in the conference.

Please refer to the website of the Linguistic Society of Japan for the contents of the Code of Ethics.
